## Python编程:从入门到实践5

## if语句

## 5.2 条件测试

```
相等与不相等 = != else要加冒号, elif不加冒号
```

```
#测试是否相等:
car = 'Audi'
if car.lower() == 'audi':
    print('Yes')

# 测试是否不相等 用!=
requested_topping = 'mushrooms'
if requested_topping != 'anchovies':
    print("Hold the anchovies")
```
